ENSAFE

ENVIRONMENTAL SERVICES
**Contracting with EnSafe through
GSA Contract No. GS-10F-0026K**

EnSafe has provided the *best value* in environmental and management services since 1980. Our clients say it best: "EnSafe personnel always think about the issues as if they were in your shoes as owners of the business."

EnSafe ensures that each client and project receives the personal attention and oversight of a Principal in the firm.

An experienced government contractor, EnSafe has an established business and project management infrastructure, so we are capable of meeting the demands of complex federal contracts. Our business systems include: CAS-compliant, JAMIS job cost accounting system; ACO-approved purchasing system; ACO-approved performance measurement system using Primavera Project Planner software; DCMC-approved property management system; and a strong socioeconomic subcontracting program.

Using GSA's streamlined ordering procedures, you can have EnSafe under contract in less time than it often takes for the "routine" government procurement process to issue a solicitation. Since GSA has already satisfied the legal requirements to advertise in the CBD, qualify vendors, offer open competition and negotiate fair and reasonable prices, your Contracting Officers can shortcut the procurement process considerably. The five steps required to get EnSafe under contract can be completed in three weeks or less!

- **SIN 899-1**, Environmental Planning Services and Documentation
- **SIN 899-2**, Environmental Compliance Services
- **SIN 899-3**, Environmental & Occupational Training Services
